

INDEX

- Albright's disease, 121.
- Anaemia, pernicious, effect of liver therapy on erythropoiesis as observed by serial sternal punctures in 12 cases of, 19.
- Azotaemia in gastro-duodenal haemorrhage, 77; general features of, 78; causes of, 85; general significance of, 93.
- Bone, fibrous dysplasia of, with endocrine disorders and cutaneous pigmentation, 121.
- Brain, pathological changes in, in fatal hypoglycaemia, 181.
- Critical review: Azotaemia in gastro-duodenal haemorrhage, 77; general features of the azotaemia, 78; results of special investigations, 80; experimental evidence, 84; causes of the azotaemia, 85; general significance of the azotaemia, 93; summary, 99.
- Diabetes, pregnancy and, 45; abnormal features of pregnancy in diabetics, 51; influence of mode and time of delivery on results, 54; breast-feeding, 56; advisability of pregnancy in diabetes, 56; hypoglycaemia, 59; methods of delivery, 60; management of the baby, 61.
- Dyschondroplasia with haemangeiomata, 203.
- Dysplasia, fibrous, of bone with endocrine disorders and cutaneous pigmentation, 121.
- Effect of liver therapy on erythropoiesis as observed by serial sternal punctures in 12 cases of pernicious anaemia, 19.
- Erythropoiesis, effect of liver therapy on, as observed by serial sternal punctures in 12 cases of pernicious anaemia, 19.
- Fibrous dysplasia of bone with endocrine disorders and cutaneous pigmentation, 121.
- Goitre, toxic, localized pretibial myxoedema in association with, 229; onset in relation to thyrotoxicosis, 231.
- Haemangeiomata, dyschondroplasia with, 203.
- Haemorrhage, gastro-duodenal, azotaemia in, 77.
- Hernia, diaphragmatic, chronic peptic ulcer of the oesophagus and its association with congenitally short oesophagus and, 105.
- Hypoglycaemia, pregnant diabetics and, 59.
- , fatal, pathological changes in the brain in, 181.
- Iodine and medical treatment during X-ray therapy in thyrotoxicosis, 4.
- Liver therapy on erythropoiesis, effect of, as observed by serial sternal punctures in 12 cases of pernicious anaemia, 19.
- Localized pretibial myxoedema in association with toxic goitre, 229; onset in relation to thyrotoxicosis, 231.
- Maffucci's syndrome (dyschondroplasia with haemangeiomata), 203.
- Measles, pneumonia secondary to, 175.
- Methyl chloride poisoning, 29.
- Myxoedema, pretibial, localized, in association with toxic goitre, 229; onset in relation to thyrotoxicosis, 231.
- Oesophagus, chronic peptic ulcer of the, and its association with congenitally short oesophagus and diaphragmatic hernia, 105.
- Pathological changes in the brain in fatal hypoglycaemia, 181.
- Pertussis, pneumonia secondary to, 177.
- Pneumonia in infants, children, and adults, 155; primary pneumonias in infants and children, 157; primary pneumonias in adults, 167; secondary to measles, 175; secondary to pertussis, 177.
- Pregnancy and diabetes, 45; abnormal features of pregnancy in diabetics, 51; influence of mode and time of delivery on results, 54; breast-feeding, 56; advisability of pregnancy in diabetes, 56; hypoglycaemia, 59; methods of delivery, 60; management of the baby, 61.

Proceedings of the Association of Physicians of Great Britain and Ireland, 1942. Thirty-sixth Annual General Meeting, 241.

Results of X-ray therapy in thyrotoxicosis, 1; iodine and medical treatment during X-ray therapy, 4.

Thyrotoxicosis, X-ray therapy in, results

of, 1; iodine and medical treatment during X-ray therapy, 4; onset of localized pretibial myxoedema in association with toxic goitre in relation to, 231.

Ulcer, peptic, chronic, of the oesophagus and its association with congenitally short oesophagus and diaphragmatic hernia, 105.
